

The Royal Society of Chemistry Top of the Bench Competition

A team of our talented chemists took part in this competition at Liverpool University last week. This is a competition which aims to stretch the brightest and most able chemists in Yrs 9, 10 and 11. Our team; Madeleine Marsland Y11, Daniel Whitfield-Bird Y10, India-Mai French Y9 and Przemyslaw Nowicki Y9 took part in three activities: a 2hrs lab task, a 1hr exam and a poster presentation. The hours of research they put in prior to the event paid off as they came 2nd in the Scientific Poster part of the competition which is an excellent achievement. They worked brilliantly together before and during the competition and really enjoyed the university laboratory experience. Well done also to Mr Herstell for negotiating the minibus around city centre Liverpool and supervising our team between activities.

Miss Briggs.
